

Reliability Report Data 2002-2011

Investor-Owned Utilities

This report summarizes the reliability indices reports filed by each of the investor-owned utilities, in compliance with 170 IAC 4-1-23(e). Reliability data is shown for the time period 2002 through 2011.

Each utility reported its indices with and without major events. Major events are storms or weather events that are more destructive than normal storm patterns. The utilities do not all define a “major event” exactly the same; therefore some utilities will capture more of their service interruptions in the “without” category than other utilities. This is one reason why one should avoid making direct comparisons among the utilities based on the indices. Service territory geography and size and customer mix are also factors that make direct comparison of the indices among the utilities difficult.

Three separate reliability indices were reported by each of the utilities:

- System Average Interruption Frequency Index (SAIFI): the total number of customer interruptions divided by the total number of customers (average interruptions per customer).
- System Average Interruption Duration Index (SAIDI): the sum of all customer interruption durations (in minutes) divided by the total number of customers (average minutes of interruption per customer).
- Customer Average Interruption Duration Index (CAIDI): SAIDI divided by SAIFI (average minutes per interruption).

“Major Events” (Weather) Summary

The following table summarizes the number of major event days each utility reported having in 2011. In addition to the major events below, IPL stated it had 19 storm events, NIPSCO stated it experienced an additional 20 weather events it considered severe, and Vectren stated major thunderstorms in June that did not meet its major event day definition resulted in a significant increase in its indices. It should be noted that one storm system can potentially cause multiple major event days.

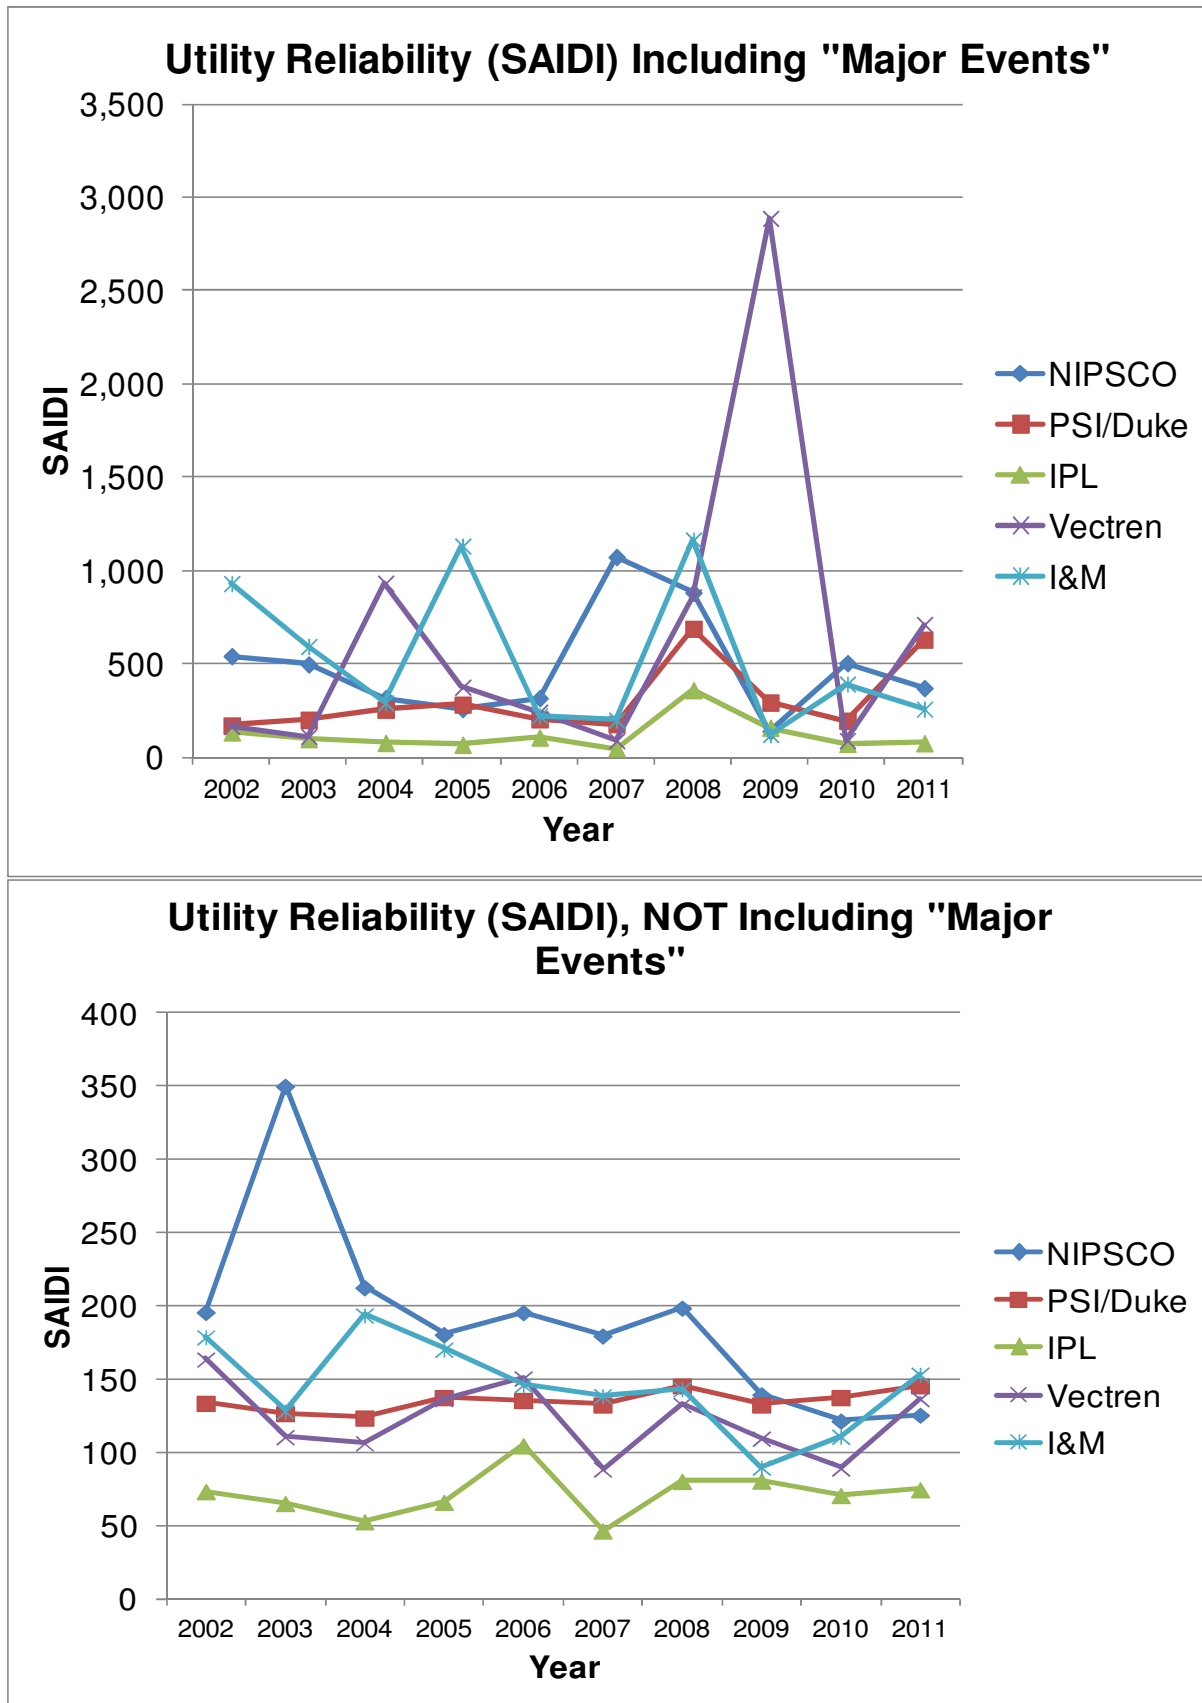

Utility	Major Event Days
NIPSCO	22
IPL	0
I&M	4
Duke Energy Indiana	12
Vectren	9

Electric Reliability: Including Major Events*
